LEADERSHIP DEVELOPMENT SERIES

Living As A Leader has been a journey of self-discovery. Each workshop is built upon a framework designed to provide a well-rounded definition of what it means to be an effective leader. The variety of methods used to deliver each concept in this Series is what made it a great experience for me. Group time to gain fresh perspective from other individuals, personal time to reflect and apply the skills, and one-on-one coaching all work in tandem to give you a comprehensive understanding of the topic and how to apply it in your own genuine style. The coaching sessions are truly valuable for personal growth, as your coach is there to ensure success—they get to know you and your personal challenges, as well as offer additional resources and perspective to expand your leadership philosophy. Since participating in this Series, I have felt more confident and effective in my personal and professional relationships. I recommend the Series to anyone looking to strengthen the relationships around them.

HR Manager, Manufacturing

My team plays a critical role in the growth and success of our organization. With the demanding schedules we each have, combined with strong, diverse personalities on the team, we have found it extremely beneficial to have the support of a facilitator and coach. Living As A Leader plays this role for us. Over the years, we have solidified our alignment as a team, strengthened our ability to collaborate and experienced overall better team health.

Since most of my staff is now working remotely the setting of and agreement to clear expectations with frequent success checks has been golden. Understanding and accepting their varied emotional reactions to this change and leading with empathy has also been quite beneficial. My go to before LAAL would definitely have been to cheerlead as the "Everything's going to be just fine" guy. Last but certainly not least I would say the overall increase of my emotional intelligence through LAAL has helped tremendously. Being more aware of my tendencies and the tendencies of others then having appropriate LAAL interactions has helped during this time of stress.
